

2021 10% conditional GP-mean replacement-window ensembles

$\pm 2.25\sigma_m$ and $\pm 2.5\sigma_m$ | same 16-bin grid, [60, 70) MeV

$\pm 3\sigma_m$ | 20 bins, [58.75, 71.25) MeV

55-75 MeV uses reproduced max-LML review with targeted unchanged-card repeats; outside is single-attempt. Ribbons are empirical spreads.
