

Factor-20 projection candidate: native 2021 10% versus 1%-source x10
Independent source families (not paired); source support ratio 10%/1% = 11.296

Toy is the independent unit ($n=10/\text{category}$); mass rows are correlated; no bands. Effective expected-count ratio = 1.130. Alternate/native 10%: 6 near-ceiling mass rows in 3 toys.
