

Second full-region observed excess: 21 MeV

The combined likelihood equals the 2015 likelihood here | signed root $r = +2.52$

- Observed data
- Background fitted with signal
- GP constraint SD (width guide)
- ⋯ GP mean before profiling
- S+B (top); fitted S (bottom)

2015 full: the only active dataset

This location has no 2016 or 2021 coverage. Opening more 2021 data cannot test or strengthen this particular feature.

Bars: counting error only. Gray shading: zero-centered GP constraint width; not fitted-background error or total residual uncertainty.
