

2015 full data: conventional fits at GP-selected masses

● Observed bins — Fitted total Profiled background - - - Null background

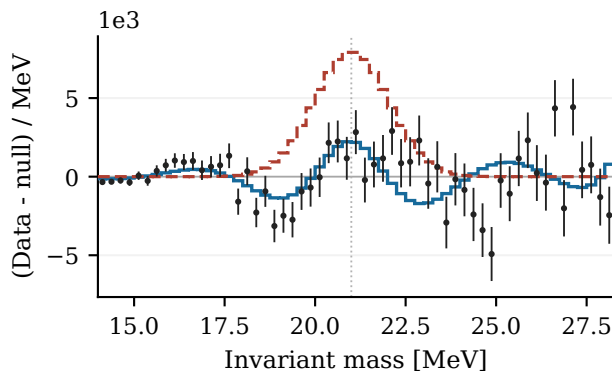

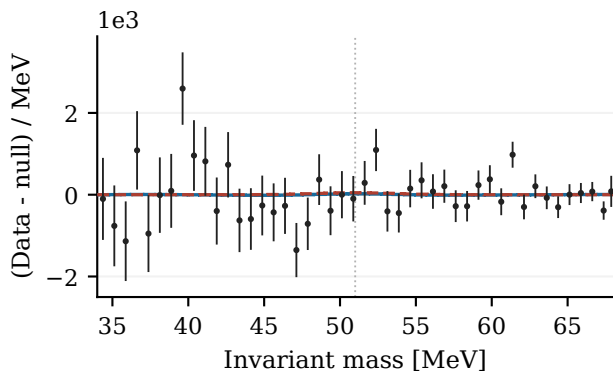

51 MeV | degree 3, total 13σ
 $r = +0.13$; D/dof = 141.7/131
Display 0.75 MeV; last 0.25 MeV

21 MeV | degree 5, total 14σ
 $r = +5.58$; D/dof = 92.5/50
Display 0.25 MeV

— Fitted total - null background - - - Gaussian signal component

Fits use native bins; display groups sum whole bins. Counting errors only.
